1. What did you enjoy the most and least about the exercise?

Data science and machine learning is a continuous and daily process,from the tasks in this exercise were thrilling experience,I got the chance to learn things and test my capability in natural language processing like task2,Overall I got great experience that has prepared me for the task ahead

2. What did you find most challenging?
Twitter developer Account for task4
 I can't really say it is a challenge but a wakeup call that,I should always have the tools of trade all the time ready,It took me a couple of days to have it in order to tackle the task,hence I was left with little time to work on it

3. What was your overall experience?
The overall experience is good,CFAfrica has taught me text analytics in another level which makes me aware and prepared about the nature of the task that awaits me in this job that I am expecting.
